## DESCRIPTION

Detailed: Following on from our recent site visit, our engineer has advised that further works are required on your sewage system.

These works are investigatory in nature and will involve accessing the pumping station to assess the cause of the issue and establish an action plan to restore the system to full working order.

Where possible, if the fault can be repaired during our visit and the required parts are available, we will make every effort to complete the repair on the same visit. This will help to minimise disruption and avoid the cost of additional return visits.

Twin Crude Pump Station - Showground
